

Ahmed Mohamed Abdelatif

Python Backend Developer & AI Automation Specialist

Cairo, Egypt | ahmееedmohaaamed1@gmail.com | github.com/ahmed-abdelatif | linkedin.com/in/ahmed-mohamed-b69920435

About

Hi, I'm Ahmed. I'm a Computer Science student and Python Backend Developer who enjoys turning real business problems into simple, reliable systems. I've worked on backend APIs, automation workflows, databases, messaging integrations, and AI-powered systems. I also have hands-on experience from my 3-month on-site role at H2M, where I worked on business tools and Meta WhatsApp Cloud API workflows. I'm still early in my career, but I care a lot about understanding how systems actually work - not just making them run.

How I Work

Build from the problem

Understand what the system actually needs before choosing the implementation.

Keep systems practical

Prefer simple, maintainable solutions over unnecessary complexity.

Design for change

Separate services and integrations so systems can evolve without rewriting everything.

Work Experience

Backend Developer - H2M - MAXP Online Platform

Full-time | On-site | Cairo, Egypt | 3 Months

Built and maintained backend tools and customer messaging workflows for MAXP Online:

- Built product pricing and profitability calculation tools.
- Developed marketing campaign tracking and shipping analytics.
- Built customer performance analytics tools.
- Built WhatsApp workflows using webhooks and message templates.
- Implemented automated replies and customer conversation workflows.
- Worked on scheduled marketing campaigns and Meta WhatsApp Cloud API integrations.

Workflow: Webhook -> Backend -> Business Logic -> WhatsApp API

Engineered Projects

AI Customer Support Platform

Receives customer messages, classifies the request, stores the conversation, and generates a response through a replaceable AI service layer.

- REST API for customer conversations, tickets, and messages
- Message classification layer for intent detection
- PostgreSQL conversation storage with status tracking
- Redis/RQ background processing for async message handling
- AI service boundary for future LLM integration

Ahmed Mohamed Abdelatif

Python Backend Developer & AI Automation Specialist

Cairo, Egypt | ahmeedmohaaamed1@gmail.com | github.com/ahmed-abdelatif | linkedin.com/in/ahmed-mohamed-b69920435

Technologies: Python | FastAPI | PostgreSQL | Redis/RQ | Docker | Pytest

Enterprise RAG Knowledge Assistant

A document-based AI assistant that answers questions using retrieved content instead of relying only on the model's memory.

- PDF/DOCX/TXT ingestion with format-specific parsers
- Text chunking with overlapping windows for context preservation
- ChromaDB semantic vector storage and retrieval
- Source-aware response generation with file citations
- Async document processing via Redis/RQ

Technologies: Python | FastAPI | ChromaDB | Sentence Transformers | PostgreSQL | Redis/RQ

AI Document Intelligence Platform

Backend pipeline for uploading documents, extracting content, and processing structured information asynchronously using background workers.

- Document upload and validation APIs (PDF/DOCX/TXT)
- Text extraction and structured data processing
- Redis/RQ background processing for long-running jobs
- Processing status tracking with real-time updates
- Auto-retry with exponential backoff for failed jobs
- Modular extraction layer for plugging in AI/OCR services

Technologies: Python | FastAPI | PostgreSQL | Redis/RQ | Docker | Pytest

Medical Event Automation Platform

Backend system for managing event registrations and automating email communication workflows via background queues.

- Event and registration management APIs
- PostgreSQL relational models for events and attendees
- Redis/RQ background email dispatch via SMTP
- Bulk sending with rate limiting and retry logic
- Delivery status tracking for each email

Technologies: Python | FastAPI | PostgreSQL | Redis/RQ | SMTP | Docker

AI Lead Qualification & CRM Automation

Receives inbound leads, uses an LLM to classify and score them, and asynchronously syncs qualified leads to an external CRM.

- REST API for lead creation, listing, and retrieval
- Pydantic request validation with email verification
- AI service layer with Groq LLM and deterministic fallback
- Structured output validation (category, score, priority)
- PostgreSQL persistence with indexed audit trail
- Celery/Redis async CRM sync with exponential backoff
- Docker Compose stack (PostgreSQL, Redis, API, Worker)

Python Backend Developer & AI Automation Specialist

Cairo, Egypt | ahmeedmohaaamed1@gmail.com | github.com/ahmed-abdelatif | linkedin.com/in/ahmed-mohamed-b69920435

Technologies: Python | FastAPI | PostgreSQL | Celery | Redis | Groq LLM | Docker

Technical Skills

Backend Engineering:	Python, FastAPI, REST APIs, Pydantic, C++
Databases & Queues:	PostgreSQL, SQLAlchemy, Redis, RQ
Integrations & Automation:	Meta WhatsApp Cloud API, SMTP, Webhooks
AI & Vector Retrieval:	RAG, ChromaDB, Sentence Transformers, Embeddings
Computer Science Core:	Data Structures, Algorithms, OOP, Clean Code
Tools & DevOps:	Git, Docker, Linux, Pytest
Languages:	Arabic (Native), English (Professional Working Proficiency)

Education

B.Sc. Computer Science

Egyptian Chinese University (ECU) - Cairo

Currently enrolled · Expected Graduation: 2029

Certifications

Python (Basic) - HackerRank

Credential ID: D208698872E9

SQL (Basic) - HackerRank

Credential ID: 3S7BFB6AASRE

SQL (Intermediate) - HackerRank

Credential ID: 203B6A8EDA03

SQL (Advanced) - HackerRank

Credential ID: EBF57B420AB

REST API (Intermediate) - HackerRank

Credential ID: 9FECDDDC70D8

Problem Solving (Basic) - HackerRank

Credential ID: 01777F8125A7

Problem Solving (Intermediate) - HackerRank

Credential ID: B937B75D7029

Outside the Code

I enjoy exploring how systems work, experimenting with AI tools, and practicing algorithms. I'm also curious about cybersecurity and how AI can make systems smarter and safer.

What I'm Looking For

I'm looking for a team where I can work on real backend and automation problems, learn from experienced engineers,

Ahmed Mohamed Abdelatif

Python Backend Developer & AI Automation Specialist

Cairo, Egypt | ahmееedmohaaamed1@gmail.com | github.com/ahmed-abdelatif | linkedin.com/in/ahmed-mohamed-b69920435

and keep building systems that actually get used.
